## **LIQUID-Table and counter tops specifications**

Ideal for play and entertainment.

The flexible surface allows with pressure from the touch of your hand or simply placing an object to play with the bubbles on the underlying colors.

The imposed pressure alters the intensity of the colors and provokes the continuous transformation of the imagery of the combined forms in continuous evolution. The surfaces are produced in two typologies mono-chromatic and bi-chromatic

### **POINTS SERIES**

The Liquid-table is applied on a wood base and can be edged in several different wood finishes.

The Liquid-table is fixed to the base with a series of steel buttons.

Top Finishes: Glossy, Matt

Sizes

Round 24" /32"

THICKNESS 1 ¼"

### **FREELINE SERIES**

Free line is characterized by its textured surface and the colored resin trim which delimits the edge.

Free line surfaces are only produced in Bi-chromatic variations. Like in the Points series, the top surface is applied to a wood base with the possibility of various edge finishes, both wood and metallic

SIZES

SQUARE / ROUND- 32"

### **LINE SERIES**

*Liquid-table is mounted on a rigid support and finished with an aluminum edge.*

*Top Finishes: Glossy, Matt*

Sizes
